

Dear Employees,

April 16, 2019

First, we would like to say thank you for your support and contributions to our success over the years. We are excited to announce that we have officially relaunched an interactive website and created a social media presence for our company along various platforms. We want you to know that as the world turns, so does Preferred Solutions Group, and we are positioning ourselves to remain connected at a pace that aligns with the world. The reason for all this change comes down to one thing: our people. We have always had a passion for our people and providing meaningful, rewarding work for our people. However, we were a best kept secret in the government contracting industry. It is time we broaden the circle and allow more people to know about the special work we do at Preferred Solutions Group.

The website and social media are designed to help interested candidates know more about us, faster. We want to ease some of the pain points that can make the hiring process slow. By giving ourselves a digital platform, we can widen our pool of talent, create a faster pipeline to vetting candidates, expedite orders within our organization, and use the increased profits to further invest in benefit programs for our employees. These things increase employee retention, client satisfaction, and overall efficiency. Our mission for this year will be expand our programmatic reach and increase the support we provide to valued employees and clients. We are not doing away with personal meetings. We have simply updated our social media channels so that you could connect with our company pages online.

Feel free to say hello on [Facebook](#), [Twitter](#), [Instagram](#), or [LinkedIn](#) to give us a virtual handshake!

Sincerely,

Barbara Posner
